e-Lōvu® | Digital Health Maternal Care Reimagined

El Camino Women's Medical Group

Why e-Lōvu Health?

Did you know that the American pregnancy care model has remained unchanged for more than 90 years? Mothers, as well as the doctors, midwives, and nurses who care for them deserve a better experience and better outcomes. Fortunately, with the latest advancements in technologies and services available at a patients' fingertips we now have the ability to fundamentally re-engineer care delivery to make pregnancy safer, more convenient, more emotionally satisfying, and more fun!

e-Lōvu is a technology enabled care platform that provides moms-to-be with remote monitoring and access to best-in-class maternal health services and technologies

Following a care plan endorsed by your doctor, e-Lōvu Patient Experience Navigators (PENpals) provide additional support and education throughout your pregnancy and postpartum months. PENpals will work with your doctor to identify any additional needs you may develop over the course of your pregnancy, and will navigate you to important services you may need. This way, you know you have a trusted guide who is working with your care team to help you avoid potential pitfalls along your pregnancy and postpartum journey.

Pregnancy and childbirth is just the beginning of a life's journey, but sets the stage for health and well-being lifelong.

At e-Lōvu we want to fundamentally transform this journey one mother and baby at a time. Let's travel this road together!

Benefits to you as a patient:

- Peace of mind with timely insights into the health of you and your baby (fetal heart rate monitoring, blood pressure, heart rate & weight to start)
- Personalized connection with a PENpal navigator
- Care enabled for you from work or home for appointments with our service partners
- Empowerment for more active engagement with your prenatal care
- An ability to have telehealth visits
